### **General Fire Safety**

- Make sure you have working smoke alarms on every level of your home and outside every sleeping area. For maximum protection, place an alarm in each bedroom.
- Check the batteries in your smoke alarm monthly and replace as necessary. Better yet, replace your alarms with long-life, lithium battery-powered alarms. These alarms have a hush feature to silence nuisance alarms caused by cooking smoke or shower steam.
- Draw a fire escape plan using a floor plan of your home including all doors and windows. Determine at least two exits from every room. Designate a meeting place outside the house where everyone

can gather after exiting. Practice the plan with your children,

preferably at night.

- Instruct small children about the dangers of playing with lighters, matches, and/or any other type of fire. Teach your child how to call for help in emergencies. Reward an understanding of safety regarding fire.
- Know how to extinguish small fires on the kitchen stove. (Simply sliding a lid over a skillet of burning grease often will extinguish a pan fire.)

### **Tualatin Valley Fire & Rescue**

Serving the cities of Beaverton, Durham, King City, Newberg, North Plains, Rivergrove, Sherwood, Tigard, Tualatin, West Linn, and Wilsonville, along with surrounding communities within portions of unincorporated Clackamas, Multnomah, Washington and Yamhill counties

## P.A.S.S. the Fire Extinguisher!

Choosing and Using a Portable Fire Extinguisher

### **Portable Extinguishers**

A fire extinguisher is basically a storage container for agents that put out fires. Common agents are dry chemicals and water. Portable fire extinguishers are designed to put out small fires, not large ones.

### **Extinguisher Classifications**

The letters on the label of an extinguisher indicate what type of fire to use it on (see below). Make sure to use the right extinguisher for the type of fire.

### Ordinary Combustibles Cloth, Paper, Plastics,

### Flammable Liquids

Gasoline, Grease, Lacquers, Oil, Paint

#### **Electrical Equipment**

Energized Electrical Equipment, Fuse Boxes, Wiring

### Combustible Metals Magnesium, Sodium

**Learn the P-A-S-S Method** 

Stand 5 to 6 feet away from the fire with a clear path to an exit behind you.

**P**ull the pin.

**A**im at the base of the fire.

**S**queeze or press the handle.

**S**weep from side to side at the base of the fire until it goes out.

# Remember, fire extinguishers are designed to put out SMALL fires!

Most portable extinguishers are designed to last about 10 to 18 seconds. If the fire gets large, do not attempt to extinguish it - get out and stay out! When exiting, close doors behind you to slow the spread of the fire.

Call 9-1-1 from a safe place.
